

Subject Syllabus of the Practices for Course of Internal Medicine
for the 3d Year Students of IMF (DENTISTRY), the 6th Term
2012-2013 Academic Year

PRACTICE SUBJECT	GROUPS	
	20	21
	DATE	
1. Rheumatic Disease. Acute Rheumatic Fever. Chronic Rheumatic Heart Disease. Dental aspects of diagnostics, emergency, treatment, prevention.	25.03	9.05
2. Infective Endocarditis - Oral health changes in patients with infective endocarditis. Dental management for patients with infective endocarditis. The role of dentists in prevention of infective endocarditis - cardiac conditions requiring antibiotic prevention, preventive regimens for dental and oral procedures.	26.03	10.05
3. Acquired Valvular Heart Disease. Mitral Regurgitation. Mitral Stenosis. Aortic Regurgitation. Aortic Stenosis etiology, hemodynamics, clinical presentation, diagnostic tests, general approach to treatment, indications for surgery, prevention. Dental management of patients with acquired valve disease.	27.03	13.05
4. Systemic connective tissue disorders. Systemic sclerosis. Raynaud's Syndrome Sjogren's Syndrome Rheumatoid Arthritis Systemic Lupus Erythematosus Systemic vasculitis: etiology, pathogenesis, classification, clinical presentation, diagnostic tests, treatment, prevention Dental management of patients who take corticosteroids.	28.03	14.05
5. Gastritis. Peptic Ulcer Disease. Complications: penetration, perforation, bleeding, pylorostenosis, malignization. Chronic disease of intestine. Chronic enteritis. Chronic disease of intestine. Chronic enteritis. Irritable bowel syndrome definition, etiology, pathogenesis, classification, clinical presentation, diagnostic tests, treatment. Inflammatory diseases of colon (Crone disease, ulcerative colitis). Risk factors, pathogenesis, clinical manifestation, treatment, prevention. Chewing disorders and it's role in a development of	29.03	15.05
6. Pancreatitis. Peculiarities of pain syndrome. Cholecystitis. Gallstone Disease. Biliary (Hepatic) Colic Chronic Hepatitis Liver cirrhosis. Dental aspects. Safety rules in treatment of patients with a hepatitis B,C,D. Emergence in case of hepatic coma, oesophageal bleeding, severe ascites.	01.04	16.05
7. Pyelonephritis. Urolithiasis. Main Syndroms - definition, etiology, pathogenesis, classification, clinical presentation, diagnostic tests, treatment, prevention. Importance of nidus of infection in prophylaxis.	02.04	17.05
8. Glomerulonephritis. Acute and chronic glomerulonephritis. Chronic renal disease. Nefrotic syndrome - definition, etiology, pathogenesis, clinical presentation, complications, diagnostic tests, treatment, prevention. Emergence in case of nephrogenic arterial hypertension. Importance of nidus of infection in prophylaxis.	03.04	20.05
9. Renal Failure. Acute and Chronic Renal Failure. Uremic coma. - etiology, classification, clinical presentation, general approach to treatment. Dental management and prevention considerations for patients with acute renal failure, pathogenesis, diagnostic tests. Oral health changes in patients with chronic renal insufficiency. Dental management for patients receiving hemodialysis. Dental management for patients receiving immunosuppressive therapy (by the example of renal transplant patients). Emergences. Dental aspects of treatment of the patient who take immunosuppressive drugs.	04.04	21.05
The Final Control Module 1	05.04	22.05
