

**Subject Syllabus of the Practices for Course of Propedeutics of Internal Medicine  
for the Third Year Students of IMF, the 6th Term, 2013-2014 Years**

| #   | Topic  | Date        |
|---|--|-------------|
| <b>MODULE 2. SYMPTOMES AND SYNDROMES OF THE INTERNAL DISEASES</b> |  |             |
| 37  | The main syndromes and symptoms of the angina pectoris and myocardial infarction. Acute coronary syndrome.   |             |
| 38  | <b>Examination of the patients with the main syndromes of respiratory pathology.</b> Enquiring, physical examination (inspection, palpation, percussion, auscultation) and added (instrumental, X-Ray, laboratory) methods of diagnostics. Examination of the respiratory function. Investigation of sputum and pleural fluid.                         | 3.02-7.02   |
| 39  | Syndrome of acute and chronic respiratory failure. Disorders of ventilatory capacity of the lungs. Types and stages of the respiratory failure. Restrictive and obstructive respiratory failure.   |             |
| 40  | Syndrome of air and fluid in the pleural cavity. Syndrome of increased airiness of the lungs. Bronchial obstructive syndrome. Syndrome of decreased airiness of the lungs. Syndrome of pulmonary cavity. Syndrome of pulmonary consolidation.  | 10.02-14.02 |
| 41  | Syndrome of pulmonary hypertension. Syndrome of cor pulmonale. Syndrome of extra-respiratory failure. Respiratory distress syndrome. Pickwickian syndrome.   | 17.02-21.02 |
| 42  | <b>Examination of the patients with the main syndromes of digestive pathology.</b> Enquiring, physical examination (inspection, palpation, percussion, auscultation) and added (instrumental, X-Ray, laboratory) methods of diagnostics of digestive tract.  |             |
| 43  | Syndrome of pain in abdomen region. Dyspeptic syndrome. Malabsorption syndrome. Irritable colon syndrome.  |             |
| 44  | <b>Examination of the patients with the main syndromes of hepatobiliary pathology.</b> Enquiring, physical examination (inspection, palpation, percussion, auscultation) and added (instrumental, X-Ray, laboratory) methods of diagnostics of pancreas, liver and gall bladder. Duodenal intubation. Investigation of bile.                           | 24.02-28.02 |
| 45  | Jaundice syndrome. Cholestatic syndrome. Hereditary hyperbilirubinemia syndrome. Hepatomegaly syndrome. Hepatolienal syndrome.   | 3.03-7.03   |
| 46  | Syndrome of portal hypertension. Hepatorenal syndrome. Syndrome of acute and chronic hepatic failure. Syndrome of hepatarhia.  |             |
| 47  | <b>Examination of the patients with the main syndromes of kidney and urinary tract pathology.</b> Enquiring, physical examination (inspection, palpation, percussion, auscultation) and added (instrumental, X-Ray, laboratory) methods of diagnostics.  | 10.03-14.03 |
| 48  | Disuric syndrome. Urinary syndrome. Hematuric syndrome. Arterial blood pressure syndrome. Syndrome of renal colic.   |             |
| 49  | Nefritic syndrome. Nefrotic syndrome. Tubulo-interstitial syndrome.  | 17.03-21.03 |
| 50  | Syndromes of acute and chronic renal failure. Uremic coma and hypochloric coma.  |             |
| 51  | Representation of the case record.   |             |
| 52  | <b>Syndrome of impaired glucose tolerance.</b> Syndrome of hypoglycaemia. Syndromes of hyperthyroidism and hypothyroidism. Diabetic coma, hypoglycaemic coma, hyperosmolar coma, hyperthyroid coma, hypothyroid coma, adrenal coma.  | 24.03-28.03 |
| 53  | <b>Clinical features and investigations of the inflammatory and degenerative affections of the locomotor system.</b> Enquiring, physical examination (inspection, palpation, percussion, auscultation) and added (instrumental, X-Ray, laboratory and functional) methods of diagnostics. Joint (arthritic and arthrosis) syndrome. Muscular syndrome. | 31.03-4.04  |
| 54  | <b>Module 2 Final Control Part 1</b>   |             |
| 55  | <b>Module 2 Final Control Part 2</b>   | 7.04-9.04   |
